Pin-Chieh(Jay) Hsia

Software Engineer

Toronto, ON | +1 (416) 564-1450 | jayhsia1997@gmail.com | linkedin.com/in/jayhsia1997 | github.com/jayhsia1997

Professional Skills

- **Backend:** Python, FastAPI, Django, RESTful APIs, Cache Systems, Message Queues
- **Cloud & DevOps:** AWS, Azure, Docker, CI/CD (GitHub Actions), Linux, Firebase
- **Databases & Storage:** PostgreSQL, Redis, NoSQL, AWS S3, Firebase Storage
- **Frontend:** JavaScript, TypeScript, React.js, HTML, CSS, Tailwind
- **Other:** System Design, Unit Test, C++, Git, Scrum, Jira, Design Patterns, Open Telemetry, Cross-team Collaboration

Work Experience

Software Application Engineer Taipei City, Taiwan
Trend Micro Sep 2021 – Feb 2024

- Developed a script for the development team using the pre-commit tool to unify code style and prevent committing sensitive information.
- Enhanced the Game feature within the Microsoft Teams application through strategic refactoring, optimizing data storage methodologies to nearly double system performance and reduce errors by approximately 90%.
- Developed a subscription notification system built on Microsoft Teams through a chatbot, enabling employees to receive notifications for specific projects.
- Researched and designed backend architecture for a new internal ticketing system, integrating a Message Queue System to improve workflow flexibility.
- Created a scheduled task script to store internal company documents as vectors in Azure AI Search, enabling AI chatbot development for knowledge retrieval.
- Collaborated with HR to design and implement a game-based onboarding application on Microsoft Teams, facilitating efficient knowledge acquisition for new employees.

Python Developer Taichung City, Taiwan
Taiwan Good Fortune Cloud Co., Ltd. Apr 2020 – Sep 2021

- Developed and maintained the internal operations and maintenance system, planning, documenting, and building RESTful APIs.
- Implemented front-end and back-end features, including asynchronous web scraping scripts.
- Led the restructuring of the system architecture for operations management, reducing server load by over 50%.
- Contributed to the implementation of the company's internal ticketing system.

Education

Seneca Polytechnic Toronto, ON
Advanced Diploma in **Computer Programming & Analysis** Jan 2025 – Sep 2027

Lunghwa University of Science and Technology Taoyuan City, Taiwan
B.S. in **Electrical Engineering** Sep 2015 – Jun 2019

Projects

The Hope Conference App • Backend Development Aug 2024 – Present

Technologies: Python, FastAPI, Vite, React.js, Tailwind CSS, PostgreSQL, Redis, AWS S3, Docker, CI/CD, Firebase

- Developed a backend system for a Conference APP using FastAPI, integrating Third Party Authentication for user login, and designed APIs for frontend usage.
- Build a simple CMS based on React.js + Tailwind CSS to allow administrators to edit the data displayed on the APP.

Personal Website • Frontend Development May 2025 – Present

Technologies: React.js, TypeScript, Tailwind, Vite, Firebase

- Developed a personal website using React.js and TypeScript, and deployed it on Firebase Hosting.
